CAREER SUMMARY

A Computer Engineer with 2+ years of experience in full-stack development and web design. Currently a Full Stack Developer in PHP Laravel, completing 7 projects in a year for a SaaS product. Previously worked remotely as a Web Designer, delivering 50+ responsive websites by converting Figma/PSD/XD designs into optimized code. Proficient in WordPress development with expertise in Elementor, responsive design, and theme customization. Skilled in server management (cPanel, VPS, WHM) and known for meeting tight deadlines, adapting to new tools, and collaborating effectively with teams and clients.

EMPLOYMENT SUMMARY

Junior Software Engineer

Deelko Software Solution (Mirpur-6, Dhaka)

Sept 23 - Present

Web Designer (Remote)

Infiknowledge Ltd. (Moncton, Canada)

May 22 – July 23

Employment

Deelko Software Solution

Junior Software Engineer

Sept 2023 – Current

KEY RESPONSIBILITIES

- Manage both frontend and backend implementations.
- Resolve bugs and integrate new modules into the systems.
- Develop and customize WordPress websites using Elementor and responsive designs.
- Deployment on servers (cPanel, VPS, ISP-Manager, WHM) & manual testing.

Projects Completed:

- Contributed to **Kazi & Associates** (<https://kaziandassociates.com.au>). Developed a dynamic, user-friendly website using WordPress and the Elementor plugin, with the latest Bootstrap, HTML, CSS for custom design.
- Contributed to **SN Trust** (<https://sn-trust.com>). Developed their website from an HTML template into a custom WordPress theme using the latest Bootstrap, HTML, CSS, JavaScript, and jQuery. SN Trust is an NGO focused on charity work, helping the poor and supporting children's growth and development.

- Developed **QS-Bazer**, a cutting-edge e-commerce platform (<https://qsbazar.com>). Created an intuitive, visually appealing interface using Laravel, HTML, CSS, JS, jQuery, and Bootstrap 5.3. Ensured dynamic functionality with Laravel, Eloquent ORM, Ajax, and MySQL, delivering a robust online marketplace.
- Significantly contributed to the **ISP Billing & Network Management** project (SAAS). Utilized PHP Laravel, Eloquent ORM, and MySQL for efficient billing and network management. Designed intuitive interfaces with HTML, CSS, Bootstrap, and JavaScript. Collaborated on troubleshooting and testing for system reliability

Infiknowledge Ltd.

Web Designer (Remote)

May 22 – July 23

KEY RESPONSIBILITIES

- Convert any UI design (Figma/XD/PSD/etc.) into a responsive website design
- Resolve design-related bugs and integrate new designs into existing projects
- Design email templates

Projects Sample:

- Designed **BelgateQ's** website (<https://belgate.netlify.app>), an inspection service provider, using Bootstrap, HTML, CSS, and JavaScript. Created a clean, professional interface from Figma design.
